PROFILE

Computer Science student with two internships and a track record of shipping real products. Comfortable across the stack — React Native, Node.js, Firebase, and early AWS work. Increasingly drawn to Python backend development, cloud infrastructure, and anything involving generative AI. Looking for an internship where the work is real and the learning curve is steep.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C, C++, SQL
Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, Firebase Authentication
Cloud & DevOps: AWS (EC2, S3, Cognito), Firebase, Git, GitHub
AI & Tools: Prompt Engineering, Generative AI Workflows, Claude, ChatGPT

WORK EXPERIENCE

Software Development Intern · SoftCoding Solution · Ahmedabad *Jun 2024 – Aug 2024*

- Built a cross-platform news app in React Native — user auth, category feeds, article bookmarking, and push notifications — from first commit to a working product.
- Added offline reading support that cached content locally; ended up being one of the most-mentioned features in user feedback.
- Resolved state management bugs that caused UI lag on mid-range Android devices, noticeably improving app responsiveness.
- Joined customer feedback sessions and translated findings into prioritized bug fixes across two iterative release cycles.

Front-End Development Intern · TechSkill Solution · Ahmedabad *Aug 2023 – Sep 2023*

- Developed a responsive coffee shop website in HTML, CSS, and JavaScript — fully functional across devices and screen sizes.
- Reduced page load time by optimizing images and deferring non-critical scripts, resulting in a measurably faster initial render.
- Delivered interactive menu animations and UI elements that the client retained unchanged in the final launch version.

PROJECTS

AI-Powered News Application · React Native · Firebase · REST APIs

- Designed and built a news app with category-based feeds, offline caching, Firebase Firestore backend, and cloud push notifications.
- Researched AWS Cognito and S3 as a migration path when Firebase costs at scale became clear — documented the full transition plan.

Firestore → AWS Cloud Migration · AWS Cognito · S3 · EC2 · IAM

- Architected a migration strategy for auth and storage — mapped IAM roles, Cognito user pools, S3 bucket policies, and CRUD endpoints.
- Produced a side-by-side cost and scalability comparison; project sits at deployment-ready stage.

Air Quality IoT Monitor · Arduino · MQ-135 · DHT11 · C++

- Built a sensor array that tracks air quality and temperature in real time, with threshold-based buzzer alerts and live LCD readouts.
- Explored pushing sensor telemetry to a cloud endpoint — a college assignment that turned into a full weekend side project.

EDUCATION

B.Tech — Computer Science Engineering (Pursuing) 2025 – 2028

Indus University, Gujarat, India

Diploma — Computer Science Engineering (7.70/10) 2022 – 2025

Gujarat Technological University, Gujarat, India

CERTIFICATIONS

AWS Foundational Learning Path · React Native Development · Cloud Application Architecture · Generative AI Workflows · Git & GitHub
